THE WILD RIDE OF CHIEF GRAY LAST EVENING

"STOLEN" CAR HADN'T "BUDGED"

Forgetting that he left his car at the depot last night instead in front of his office on North Main street, Dr. McAnally had the officers to get busy looking for the "stolen" car. Telegrams were sent here and there and Chief of Police Gray went to Thomasville and had intended going on to Salisbury in search of the supposed thieves. However Ed Mungo, with his eagle eye spied "Doc's" car alongside the depot and forthwith imparted the information and imagine the chagrin of the doctor when he realized that in the hurry at the depot and a call to his office while there he had forgotten to steer his car to the accustomed place, and this was the cause of much excitement which finally felt so flat.

A GERMAN SOUVENIR.

Chas. Reith showed the editor Saturday a 2 pfening of Germany which was given him by a sailor on the interned Kron Prinz Wilhelm at Portsmouth, Va., recently. The "two pence" had been carried by the sailor all through the many raids and battles of the German ship. The other wording on the money is "Deutsches Reich, 1904." Mr. Reith also has a hat band composed of the national colors of the "Father land."

If you feel peevish and want to smash a hat, first see that the town knocker's head is underneath. The hat may be some loss but the head will not count.

GALVESTON SUFFERS FROM TROPICAL HURRICANE

BIG STORM ALONG GULF COAST

The tropical hurricane that swept over southern Texas Monday evening carried destruction in its wake. The docks and shipping interests suffered greatly. At Galveston the water stood three feet in the streets, despite the huge sea walls. Houses all along the water front were destroyed, wires were down and the city was in darkness. Many people left the city and others took refuge on government boats. Farms on the coastal plains suffered severe damage and the property loss will be heavy. The loss of life so far reported totals over 100. It is thought that the damage will exceed that of 1900 when over fifty millions of dollars were swept away and hundreds of lives lost. The big sea walls were also badly damaged.

MERCHANTS IN SESSION.

The Merchants Association of High Point held its regular monthly meeting Tuesday evening. The matter of properly rating the credit buyers of the city occupied most of the time of the merchants. Blanks will be handed out so as to get a perfect tab on all credit buyers to go in the new rating book. In the meantime those owing accounts are asked to adjust these matters as quickly as possible for the good of both parties concerned. The merchants are also planning to have something in the way of entertainment at an early date but no set plans have been made. It is desired that this feature be something out of the ordinary.

Pay-up week was a good proposition for a starter and much good has and will be accomplished from the venture.

ANCIENT INDIAN CAVE OF RARE GOLD AND RELICS

GIVES EXPLANATION OF MOUNTAIN SLIDE.

Thomasville Citizen Offers an Ingenious Theory of the Recent High Rock Phenomenon.

Thomasville, Aug. 14.—The High Rock mountain slide, which so much has been said about recently, was visited by a Thomasville citizen a few days ago and his report of the condition of the mountain and the cause for it is about as follows:

"I found three acres of the mountain that had given away. After carefully examining it I decided that it was an ancient Indian cave that had been used by the chief of a tribe as a store house for supplies. It is possible that here were kept the riches of the tribe, their gold, silver and ammunitions of war. The cave was so cunningly devised that it had never been discovered. It was so secretly and cunningly hidden in the mountain side that all traces of it had long ago disappeared. Only when the inside walls gave away was the secret revealed to man. There is no doubt in my mind that a large amount of Indian gold and other valuable Indian relics are stored away in the mountain. The gentleman's statement has its weight among the people of Thomasville, for near the slide there has been in time several valuable gold mines. It is probable that there is some gold mined from these mines by the Indians stored away in the cave which recently fell in."
